GENERAL

PUBLICATION

AERONAUTICAL INFORMATION CIRCULAR (AIC) NUMBERING CONVENTION CHANGE

The Directorate of Civil Aviation has changed the Aeronautical Information Circular (AIC) numbering convention to comply with International Civil Aviation Organisations (ICAO) standards and recommended practices.

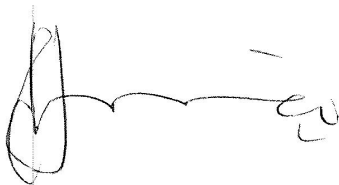

Effective 01 June 2016 all AIC's shall be allocated a serial number which shall be consecutive and based on the calendar year. E.g. 01/16, 02/16, 03/16 etc.

The series 10, 20, 30, 40, 50 and 60 will be replaced by series A and B

The two series are classified into the following scopes:

- ❖ Series A, for information of an international scope,
- ❖ Series B, covering information of national interest.

All AIC's will be republished and replaced to conform, however this will be phased in process as AIC's are reviewed for validity and applicability.
