Intention to Establish a

Standard Transition Altitude 10000FT at Specific Aerodromes in Namibia

1. The intent of this Circular is to notify industry of plans to establish a standard Transition Altitude (TA) at specified aerodromes in Namibian airspace.
2. Currently different TAs are listed in the Namibian AIP for various aerodromes and this has been found to be confusing if the correct data is not used.
3. To ensure standard application and uniformity a standard Transition Altitude of 10000ft will be established for all:
 - i. Controlled aerodromes; and
 - ii. Aerodromes which have instrument approach procedures.
4. Notification of Change of the TA for individual aerodromes as well as the effective dates of the changes will be published by AIP Supplement and notified by a Trigger NOTAM, Alternatively the change may be introduced with the publication of new or reviewed Instrument Approach Procedures for specific aerodrome.
Some hand amendments of AIP may be necessary and shall be notified by NOTAM
5. This AIC will be cancelled after sufficient notification or when the review process is completed.
